**Special thanks to Dr. Tali Boritz (Assistant Professor at York University), who developed this course**

Course information: Course discussion/participation will be completed on Quercus. Students will have the opportunity for synchronous online office hours to ask questions and clarifications about course content. Students need the ability to read and edit PDFs or Powerpoint slides and use Quercus for submission of most assessments.

Course Description, Goals, and Prerequisites

This course will provide students with a critical review of the core theoretical approaches to psychotherapy and the core principles that have been identified as central to the process of change in psychotherapy. Differences in theories of psychopathology and clinical practice between psychotherapy approaches will be highlighted using case studies. Students will begin to conceptualize cases and identify specific strategies and interventions appropriate for specific clients’ issues. Didactic course content will be enhanced with video illustrations of various psychotherapy techniques and approaches to psychotherapy.

Learning Outcomes:

By the end of this course, students should be able to:
1. Describe the history, theoretical foundations, and key features of several major psychotherapies;
2. Contrast specific psychotherapies in terms of treatment targets, goals, and features;
3. Define empirically supported treatments and related concepts in clinical practice and research;
4. Identify several specific pairings of psychological disorders and treatments that have strong evidence bases;
5. Explain the concepts of specific and common factors, and how they relate to empirical treatment research and clinical practice;
6. Identify ethical issues and guidelines related to psychotherapy practice.
Exclusion: PSY343H5/PSYC36H3

Note about prerequisites: It is your responsibility to ensure that you have met all prerequisites listed in the Psychology section of the A&S Calendar for this course. If you lack any prerequisites, you will be removed. No waivers will be granted.

Lectures: PowerPoint and PDF slides will be posted before class on the date stated in the course schedule (found below). These slides should be downloaded and/or printed to facilitate note taking. Please note that if you do not understand a particular concept as it is presented, please ask questions! It is your responsibility to let us know if you do not understand a particular concept or idea.

Any posted lecture recordings and slides are only for the exclusive use of enrolled students, for their personal learning. Lecture recordings and slides are not to be shared in any way beyond enrolled students.

Participation: There will be short reflection assignments given in classes to be completed on Quercus. Students will reflect on a topic covered in class, applying the course material to their response. Students will have at least 24 hours to respond to these discussion questions on Quercus (see the course schedule, below).

Applied Learning Activities: Students will apply concepts from the course material to case studies they are presented with. These case studies will be written materials or videos where the student will analyze the case and apply their knowledge from the course to various questions posed. Further information will be posted on Quercus.

Commentary Assignment: The research commentary assignment is an analysis of a recent original research article (aka experimental study) of the student’s choice that examines an issue related to the course (ie. is an experiment that produced new research on therapeutic treatment of psychopathology). Please see the commentary assignment outline for further details, which is available for download on Quercus.

Review Paper: Students will critically review research to write a scholarly paper on the evidence for the pairing of a mental health disorder (e.g., DSM-5 diagnosis such as PTSD) and a specific type of psychotherapy for that diagnosis (e.g., Prolonged Exposure for PTSD). The review paper should be maximum 6 pages long and follow APA formatting guidelines. Please see the review paper outline for further details, which is available for download on Quercus.

Final Exam: The final exam will consist of multiple-choice questions and written response questions (with a strict word limit). Students will access the exam through Quercus and will have
at least 3 hours to complete the test, individually, using their own lecture slides, readings and notes only. Students will not need to provide citations and should not be using any outside sources. It is expected that students will use their notes from lectures to assist in their writing the exam, which will be more about one’s ability to apply their knowledge than rote memorization.

**Course Webpage/Quercus**

This course uses the University's learning management system, Quercus, to post information about the course. This includes posting readings and other materials required to complete class activities and course assignments, as well as sharing important announcements and updates. The site is dynamic and new information and resources will be posted regularly as we move through the term, so please make it a habit to log in to the site on a regular basis.

The website associated with this course is accessible via [http://q.utoronto.ca](http://q.utoronto.ca)

SPECIAL NOTE ABOUT GRADES POSTED ONLINE: Please also note that any grades posted are for your information only, so you can view and track your progress through the course. No grades are considered official, including any posted in Quercus at any point in the term, until they have been formally approved and posted on ACORN at the end of the course. Please contact the instructor (and TA) as soon as possible if you think there is an error in any grade posted on Quercus.

**Course Policies**

**Missed Assessments/Medical Documentation/ACORN Self-Declaration Tool**

If you are unable to complete a test or assignment, you should submit an absence self-declaration within one week to the instructor. The absence self-declaration tool is available on ACORN and applies for both medical and non-medical circumstances.

**Religious Accommodations**

As a student at the University of Toronto, you are part of a diverse community that welcomes and includes students and faculty from a wide range of cultural and religious traditions. For my part, I will make every reasonable effort to avoid scheduling tests, examinations, or other compulsory activities on religious holy days not captured by statutory holidays. Further to University Policy, if you anticipate missing a major course activity (such as an assessment) due to a religious observance, please let me know as soon as possible so that we can work together to make alternate arrangements.

**Penalties for Lateness**

A penalty of 10% per calendar day, up to and including the last day of classes, will be applied for late assignments. After the last day of classes, the penalty of 10% per calendar day will be applied by the Undergraduate Counselor on behalf of the Department. No penalty will be assigned if a request for special consideration was successful. Any term work that will be handed in after the final day of the term is subject to a petition for extension of term work. This petition should be filed with the student’s College Registrar’s Office.

**Ouriginal**

Normally, students will be required to submit their course assignments for review of textual similarity and detection of possible plagiarism. In doing so, students will allow their assignments
to be included as source documents in the Ouriginal reference database, where they will be used solely for the purpose of detecting plagiarism. We will be using Ouriginal in this course for submission of your assignments and applied learning activities. You have the option to opt out of using this service. If you wish to do so, please email me.

Contact
All communication should be sent via University of Toronto email addresses only. Please include “PSY343” in the subject line, and do not send messages through Quercus/Canvas (as they often get filtered as spam/junk). The University requires that all students have a U of T email address and check it regularly; it is the only address to which official university communications will be sent. If you are unable to attend office hours or would like to discuss matters concerning the course directly, please email us to schedule an appointment.

Requesting a Regrade
If you think an assessment has been incorrectly marked, you can request a regrade. In this case, you must first review your assessment with the TA. Following review with the TA, if you wish to have your assessment reviewed by the instructor, please submit a request by email within 2 weeks of the grade return date.

Academic Resources

Accessibility Needs:
Students with diverse learning styles and needs are welcome in this course. If you have an acute or ongoing disability issue or accommodation need, you should register with Accessibility Services (AS) (www.accessibility.utoronto.ca) at the beginning of the academic year. Without registration, you will not be able to verify your situation with your instructors, and instructors will not be advised about your accommodation needs. AS will assess your medical situation, develop an accommodation plan with you, and support you in requesting accommodation for your course work. Remember that the process of accommodation is private: AS will not share details of your condition with any instructor, and your instructors will not reveal that you are registered with AS.

Writing:
As a student here at the University of Toronto, you are expected to produce well-written assignments. The university provides its students with multiple resources to help them achieve this. For more information on campus writing centres and writing courses, please visit http://www.writing.utoronto.ca/.

Academic Integrity and Plagiarism:
All students, faculty and staff are expected to follow the University’s guidelines and policies on academic integrity. For students, this means following the standards of academic honesty when writing assignments, collaborating with fellow students, and writing tests and exams. Ensure that the work you submit for grading represents your own honest efforts. Plagiarism—representing someone else’s work as your own or submitting work that you have previously submitted for marks in another class or program—is a serious offence that can result in sanctions. Speak to me or your TA for advice on anything that you find unclear. To learn more about how to cite and use source material appropriately and for other writing support, see the U of T writing support website at www.writing.utoronto.ca/. Consult the Code of Behaviour on Academic Matters for a complete outline of the University’s policy and expectations. For more information, please see http://www.artsci.utoronto.ca/osai and
http://academicintegrity.utoronto.ca/

Other Resources
Student Life Programs and Services (http://www.studentlife.utoronto.ca/)
Academic Success Services (http://www.studentlife.utoronto.ca/asc)
Counselling and Psychological Services (http://www.studentlife.utoronto.ca/hwc)

Course Outline/Schedule
Every effort will be made to manage the course as stated. However, adjustments may be necessary in these unprecedented times. If so, students will be advised and alterations announced on Quercus prior to implementation.
