Course Description, Goals, and Prerequisites

Course Description:

Learning allows our experiences to shape what we know, what we can do and how we interact with our environments. This course addresses the fundamental concepts and more important research findings related to contemporary theories of associative learning in animals and humans. It examines the application of such fundamental research to issues such as the neural substrates of behaviour, drug use, and anxiety disorders. It is designed to foster skills in critical thinking, experimental design and reading primary sources in this area.

Course Objectives: By the end of the course students will have:

- knowledge and understanding of the basic behavioural phenomena that reveal the conditions under which learning occurs and the content of that learning.
- the ability to apply critical and creative thinking, skeptical inquiry and the scientific approach to answer questions related to learning and behaviour.
 - the ability to identify key concepts and relate these to your own life.
- examples of how learning contributes to conditions such as anxiety and drug use as well as rationales behind therapeutic interventions such as applied behaviour analysis.

Note about prerequisites: It is your responsibility to ensure that you have met **all** prerequisites listed in the Psychology section of the A&S Calendar for this course. If you lack any prerequisites you will be removed. No waivers will be granted.

Prerequisite:

PSY201H1/ ECO220Y1/ EEB225H1/ GGR270H1/ POL222H1/ SOC202H1/ STA220H1/ STA238H1/ STA248H1/ STA288H1/ PSY201H5/ STA215H5/ STA220H5/ PSYB07H3/ STAB22H3/ STAB23H3/ STAB57H3, and PSY260H1/ PSYB38H3

Exclusion:

PSY360

Distribution Requirements: Science

Breadth Requirements: Living Things and Their Environment (4)

Reading Material/Textbook(s)

The following textbooks will provide background to the topics discussed **but are not required**. Weekly readings (articles) will be assigned and details will be provided on the course website.

Bouton, M.E. (2016). Learning and Behavior: A contemporary synthesis, 2nd Edition. Sinauer

De Houwer, J. & Hughes, S. The Psychology of Learning: An introduction from a Functional-Cognitive Perspective. MIT press

Available to download free: https://psychologyoflearning.be/

Assigned articles will be announced via Quercus and, where possible, PDFs provided through the library.

Course Evaluation/Marking Scheme

Date	Assessment	Weight
Multiple dates (see schedule) Due on Mondays	Reading Questions	(5 x 7) 35%
Feb 11th	Quiz 1	17%
Mar 18th	Quiz 2	18%
Exam period	Final exam	30%

Course Webpage/Quercus

The website associated with this course is accessible via http://g.utoronto.ca

This site will be used to post course materials (e.g. syllabus, slides, links), to make announcements, and this is where you will view your grades. Please check here for general course information before contacting the instructor or TAs. It is a good idea to check the site regularly (at least every week) for any updates about the course. *If you have any general questions regarding Quercus, please visit https://q.utoronto.ca/courses/46670*).

Course Policies

What to expect

I appreciate your patience this semester as we do our best to navigate the ever-evolving situation with COVID-19. I will update you as soon as possible if restrictions and course delivery instructions change.

For January:

The lectures are recorded and links and new materials will be posted by **Fridays** each week. I use Loom to record and post lectures. I have used it for several previous courses with high success.

Slides will be posted on the course website to assist with note taking.

Reading assignments will be due approximately every two weeks. You will complete a series of questions for each assigned reading(s) and submit these to Quercus. Please see the schedule below for exact dates. Key concepts related to the readings will be covered in lecture but the readings will illustrate a real life application of course materials.

Quizzes will assess lecture material whereas the Reading Questions assess applications covered in the readings. The final exam will be comprehensive (covering material from the entire course) and include questions related to both.

Quizzes and the Final Exam will be administered online.

Staying connected in the course

If something doesn't make sense to you, please ask questions early. I am happy to arrange a meeting and you are welcome to email questions to myself or the TAs. Please also make use of the Discussion board to interact with your peers and help each other with the material. Please use your utoronto email addresses for all course-related communications, and check this address regularly for any announcements related to this course. Please include PSY360 in the subject line of the email. While I will attempt to answer straightforward questions over email, if you send complex or vague questions over email, you may be asked to bring your question to office hours for discussion. We will try to respond promptly but please allow 48 hours for a response excluding weekends and holidays before sending a reminder. Common questions and my response will be posted to the Discussion Board and so you may be directed there.

Specific Medical Circumstances

This term the Verification of Illness (also known as a "doctor's note") is temporarily not required. Students who are absent from academic participation for any reason (e.g., COVID, cold, flu and other illness or injury, family situation) and who require consideration for missed academic work should report their absence through the online absence declaration. The declaration is available on ACORN under the Profile and Settings menu. Students should also advise their instructor of their absence. If an absence extends beyond 14 consecutive days, or if you have a non-medical personal situation preventing you from completing your academic work, you should connect with your College Registrar. They can provide advice and assistance reaching out to instructors on your behalf.

https://help.acorn.utoronto.ca/blog/ufaqs/declare-an-absence/

Accommodation for Personal Reasons

There may be times when you are unable to complete course work on time due to non-medical reasons. If you have concerns, speak to me or to an advisor in your College Registrar's office; they can help you to decide if you want to request an extension or accommodation. They may be able to provide you with a College Registrar's letter of support to give to your instructors, and importantly, connect you with other resources on campus for help with your situation.

Religious Accommodation

As a student at the University of Toronto, you are part of a diverse community that welcomes and includes students and faculty from a wide range of cultural and religious traditions. For my part, I will make every reasonable effort to avoid scheduling tests, examinations, or other compulsory activities on religious holy days not captured by statutory holidays. Further to University Policy, if you anticipate being absent from class or missing a major course activity (such as a test or in-class assignment) due to a religious observance, please let me know as early in the course as possible, and with sufficient notice (at least two to three weeks), so that we can work together to make alternate arrangements.

Make-Up Quizzes/Assignments

There will be no make-up tests or assignments. In you miss a test or assignment deadline you must complete the absence declaration on ACORN as soon as possible and notify me within one week via email. If you miss a quiz during the semester and provide the absence declaration, the weight of an in-class test will be transferred to the exam. If you provide the absence declaration, extensions for reading questions are only possible until the marks and feedback for on-time assignments are released (typically one week later). Once feedback is returned to the class, if we haven't received your assignment, the marks will be allocated to the final exam. If the final exam is missed, a deferred exam will be scheduled for a future date. If you have an ongoing issue that is likely to affect your performance in the course, please contact accessibility services (more details below) and contact me if this is likely to impact your ability to meet course due dates.

Questions about grading

Any questions regarding a grade received in this course must first be brought to the attention of the TA. The student and TA must first discuss the grade and how it was reached. If the student is not satisfied with the response of the TA, the student can submit an appeal to Dr. Corbit. This must be done within two weeks of when the work was returned. You must present a clear argument for why the mark is in error and detail the item(s) that were not assessed accurately. Claims that the assigned marks were simply too low (or too high) will not be considered. A legitimate request will result in a re-grade of the entire work which may result in a higher, lower or identical grade.

Lecture recordings and other course materials (slides, notes etc.)

Course materials including lecture recordings are provided for the exclusive use of enrolled students to support their personal learning. Do not share them with others. I do not want to discover that a student has put any of my materials into the public domain, has sold my materials, or has given my materials to a person or company that is using them to earn money. The University will support me in asserting and pursuing my rights, and my copyrights, in such matters.

Academic Resources

Students with Accommodation Requirements

Students with diverse learning styles and needs are welcome in this course. If you have an acute or ongoing disability issue or accommodation need, you should register with Accessibility Services (AS) at the beginning of the academic year by visiting

http://www.studentlife.utoronto.ca/as/new-registration. Without registration, you will not be able to verify your situation with your instructors, and instructors will not be advised about your accommodation needs. AS will assess your situation, develop an accommodation plan with you, and support you in requesting accommodation for your course work. Remember that the process of accommodation is private: AS will not share details of your needs or condition with any instructor, and your instructors will not reveal that you are registered with AS.

Academic Integrity

All students, faculty and staff are expected to follow the University's guidelines and policies on academic integrity. For students, this means following the standards of academic honesty when writing assignments, collaborating with fellow students, and writing tests and exams. Ensure that the work you submit for grading represents your own honest efforts. Plagiarism—representing someone else's work as your own or submitting work that you have previously submitted for marks in another class or program—is a serious offence that can result in sanctions. Speak to me or your TA for advice on anything that you find unclear. To learn more

about how to cite and use source material appropriately and for other writing support, see the U of T writing support website at http://www.writing.utoronto.ca Consult the Code of Behaviour on Academic Matters for a complete outline of the University's policy and expectations. For more information, please see https://www.artsci.utoronto.ca/current/academic-advising-and-support/student-academic-integrity and https://academicintegrity.utoronto.ca

University's Plagiarism Detection Tool

Normally, students will be required to submit their course essays to the University's plagiarism detection tool for a review of textual similarity and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the tool's reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of this tool are described on the Centre for Teaching Support & Innovation website (https://uoft.me/pdt-faq).

Other Resources

As a student, you may experience a range of challenges that can interfere with learning, such as strained relationships, increased anxiety, substance use, feeling down, difficulty concentrating and/or lack of motivation. These factors may affect your academic performance and/or reduce your ability to participate fully in daily activities. There are many helpful resources available through your college Registrar or through Student Life (studentlife.utoronto.ca). An important part of the University experience is learning how and when to ask for help. Please take the time as early as possible to inform yourself of available resources and do not hesitate to seek assistance to help learn what supports are available.

Course Outline/Schedule

Date	Topics	Assessments
Week 1 Jan 14	Introduction to the course. Non-associative and associative learning.	
Week 2	Classical conditioning principles and conditions necessary for learning	Monday Jan. 24 - Reading Assignment 1
Jan 21		
Week 3 Jan 28	Some more surprizing findings and updated view on the conditions necessary for learning	
Week 4 Feb 4	Prediction error and the Rescorla-Wagner Model	Monday Feb 7 – Reading Assignment 2
Week 5		Friday Feb 11 – Quiz 1 (covers weeks 1-4)
Feb 11		
Week 6 Feb 18	Evidence of learning and determinants of the nature of the learned response	Friday Feb 25 – Reading Assignment 3 (**note you are welcome to submit this assignment
		early so that you can have a break over reading week)
	READING WEEK – NO CLASS	
Week 7	Instrumental learning – the basics	
Mar 4		
Week 8	Instrumental learning and behaviour modification techniques	Monday March 14 – Reading Assignment 4
Mar 11		
Week 9	Control Conditions and other sources of behaviour change	
Mar 18		
Week 10		Friday March 25 – Quiz 2 (covers weeks 6-9)
Mar 25		
Week 11	Inhibition and Extinction	
Apr 1		
Week 12	The stability of learning and behaviour: Harnessing learning priciples to remove	Monday April 11 – Reading Assignment 5
Apr 8	unwanted behaviours.	EXAM (cumulative) in the final
		examination period

Note: Lecture topics may be updated if more or less time is needed for particular topics based on feedback from the class. Any changes will be posted to the course website.

Details on Assignments

Reading Questions (35% (5 x 7%)). The purpose of the reading questions is to guide you through readings about a specific application of learning principles and help you evaluate a piece of research. The questions will be posted along with the readings and will be due on Mondays thoughout the semester (please see schedule above for exact dates).

Quizzes (35% (total, there are two quizzes). Quizes will assess lecture material. They may contain a combination of multiple choice and short answer questions. Further details (number of points, exact composition) about each quiz will be provided closer to the assessment date. There are no make-up quizzes. If you miss a quiz the points will be allocated to the final exam.

Final Exam (30%). The final exam will be comprehensive but with heavier weighting of material covered after the last term Quiz. The course readings will also be assessed in the exam. The style of questions will be similar to those found on the previous tests. Further details will be provided closer to the time of the exam.
